Education

New York Institute of Technology

September 2024 – May 2028

Bachelor of Science in Computer Science

Theodore K. Steele Memorial Scholarship (\$29k) — New York, New York

Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, CodePath Intermediate Technical Interview Prep, Codepath Advanced Web Development, Codepath AI Fundamentals

Technical Skills

Languages: Java, Python, JavaScript, C++, TypeScript, HTML/CSS, MATLAB

Developer Tools: VS Code, AWS, Azure, Git/GitHub, Arduino, Linux/Kali, Docker, Postman, ComfyUI, n8n

Technologies/Frameworks: React, Node.js, Express.js, Vite, Flask, Tailwind CSS, MaterialUI, Unity, GenAI, RAG, Robotics, Web Scraping

Certifications: Pluralsight Java Fundamentals, TestOut Network+, TestOut Security+, CompTIA Network Fundamentals

Experience

New York Institute of Technology

December 2024 – Present

Engineering Research Assistant | bioeteam.us

New York, New York

- Designed and iteratively refined **20+ custom 3D-printed components**, experimenting with prototypes to meet complex biomedical research requirements and simplify research processes
- Created an automatic scaffold design workflow in CAD Software by integrating findings from **4+ research papers**, decreasing design time by **75%**

Accenture

October 2022 – July 2025

Software Engineering Apprentice

New York, New York

- Engineered and delivered **10 emerging tech demos (Robotics, GenAI, XR, BCI)**, highlighting novel tech and its business impact to **5,000 people daily**, unlocking consulting opportunities by presenting to **C-Suite Executives, Clients and Managing Directors**
- Developed a GenAI digital-human assistant leveraging **AWS (Lex, SageMaker, Lambda, DynamoDB)** and **RAG pipelines** to generate personalized itineraries and relay tech trends from **4,300 CES exhibitors** to **138k attendees**; recognized with Billboard's **"Best Use of GenAI" award** at CES 2024 (138k Attendees)
- Architected the **AWS & Python** backend of a **GenAI powered Boston Dynamics Robot Dog** with a **5-member team**, commanded by voice, and utilizes Computer Vision to analyze hazardous objects autonomously

Projects

n8n AI Assistant | *n8n, GenAI, Docker*

November 2025

- Hosted a **local n8n instance** through **Docker** to pull and summarize info from **3+ RSS Feeds**
- Connected n8n workflows to a Discord server to message important information

Final Exam Finder GUI | *Java, Swing*

May 2025

- Implemented a Java-based tool with a Swing interface to parse final exam spreadsheet data and simplify final exam search, reducing the time spent searching exams by **65%**

GenAI Image Generation Assistant (Advyna) | *AWS, ComfyUI*

January 2025

- Deployed AWS Backend to manage waitlists and databases using **DynamoDB, Lambda, and APIGateway**.
- Utilized SDXL Models and ComfyUI to generate **100+** images of modeled clothing styles based on user input.

Leadership / Extracurricular

Association for Computing Machinery (ACM)

September 2024 – Present

Vice President

- Prototyped React web applications across **3+ Hackathons** to solve various societal problems.
- Worked alongside **20+ members** on LeetCode questions, learning Data Structures to solve various problems.

FIRST Robotics Competition

January 2025 – Present

Software Engineering Mentor

- Mentored **3 software teams (9 high school students)** in Programming. Allowing rookie teams to **outrank 60%** of all NYC Teams and veteran team to **ranked 9th/4000+ teams** worldwide.
- Advised **30+ high school students** in Java robotics coding through teaching, online meetings, and presentations.
- Devised a **13-video programming course (5k views)** on essential skills needed to program robots
